Tech Kids

Teaching technology to young minds

Vision:

To be an institute of excellence, nurturing young minds for better future.

Mission:

To provide technical knowledge for young minds, thus empowering their bright future

WHAT WE ARE?

- TechKids is an initiator of technologies in young minds via technological literacy programs taught during school hours and as after-school activities.

- Our main goal is to ignite passion in students and to enhance the technical skills of future India.

- TechKids wont turn children into masters of any technology but we provide a strong foundation to understand technology: how it works, why it works and how to think in order to invent new solutions.

WHAT WE DO?

- E_{nlight} : We enlight students about the need of technology.

- E_{xcite} : We excite students about learning.

- E_{ducate} : We educate students with the skills they need for the future.

- E_{mpower} : We empower students to learn problem-solving and critical thinking skills to be the innovators and leaders.

- E_{xplore} : We pave the way for students to explore themselves in technical field.
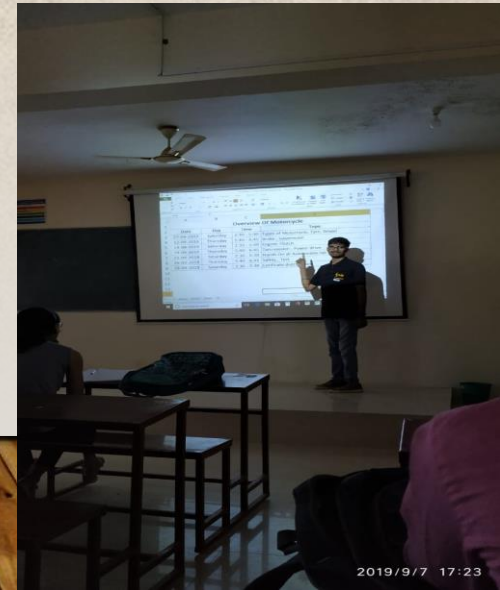

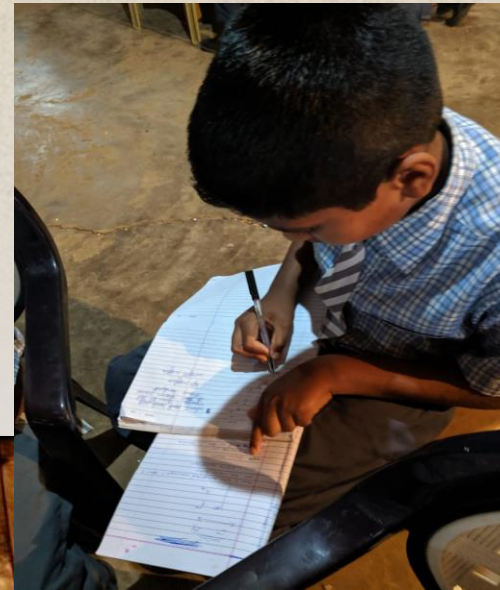

WHAT YOU GET?

- Learn Programming by Scratch. (Visual Programming language)

- Hands-on working experience with microcontrollers and various modules.

- Team-working skills.

- Students will transform from passive technology users to passionate innovators.

- Competitions conducted at the end of the day will help students showcase their skills and innovative ideas.

WORK DONE

- Conducted workshop for government school students Bunahali.

- Conducted crash course for 1st year students on "Overview of Motorcycle" and "Build your own website".

THANK YOU

Every once in a while, a new technology, an old problem, and a big idea turn into an innovation.
